EXAMINER'S AMENDMENT

The following is an examiner's statement of reasons for allowance:

Fisk, the closest prior art, shows some of the steps claimed herein but fails to teach or suggest detecting and removing radioactive waste before grinding the waste, sterilizing it and then composting the waste. Removal of radioactive waste from waste water is shown by Hendricks et al. but the reference does not teach municipal solid waste that is bioconverted. The prior art made of record (including the STIC Library search) shows that detection of radioactive waste with a Geiger Counter was known but such art fails to present a nexus between such detection and its incorporation as method steps wherein radioactive waste is detected and separated, in the bioconversion of radioactive-contaminated municipal solid waste to compost.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
